EXAMINER'S AMENDMENT

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art of record is Mametani et al., U.S. Patent 5,478,759. Mametani et al. disclose a method of forming an isolation region that includes the implantation of p-type dopants through field oxide layers to form a retrograde well 61. Mametani et al. also form "sidewalls" in the substrate extending from the bottom of the field oxide layers into the retrograde well 61, see, for example, figures 7(A), 13 and 14. However, Mametani et al. fail to teach or suggest implanting the dopants to form an isolated pocket of the substrate. In addition, Mametani et al. form both the retrograde well and the "sidewalls" in the substrate from dopants which are the same conductivity type as the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
